Begriffe

class – object

feature – command – query – argument

keyword – comment – declaration

indentation

syntax – semantics

interface – client – supplier

GUI - API

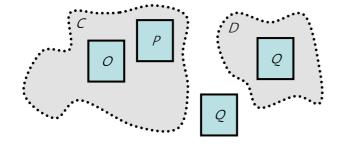

3

A Class Is

the description of a set of possible runtime objects to which the same features are applicable.

Object, Instance & Generating Class

If an object $\mathcal O$ is one of the objects described by a class $\mathcal C$, then $\mathcal O$ is an instance of $\mathcal C$, and $\mathcal C$ is the generating class of $\mathcal O$

4 Comments And Sense

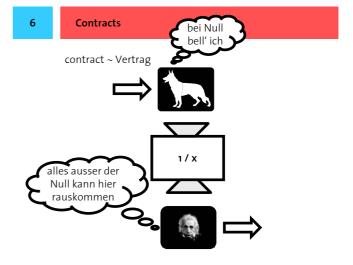

Don't even think of writing a feature without immediately including a header comment explaining what it's about.

5 Logik

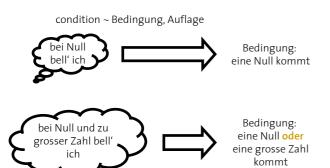

programming is reasoning

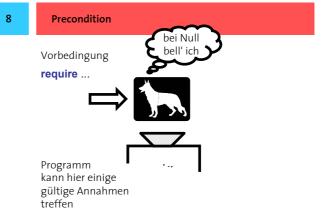

- Argumentation
- Beweisführung
- logisches Denken
- Schlussfolgerung

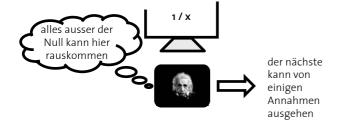

9 Post condition

ensure ...

Nachbedingung

10 Beispiel: Umkehrwert einer Zahl berechnen

class MEINEZAHL

feature
 zahl: INTEGER

kehrum is
 -- berechnet Reziprokes der Zahl
require
 zahl /= 0
do
 zahl := 1 / zahl
ensure
 zahl /= 0
end
